

Data Relay

Improve operational analysis with regular data feeds from PointClickCare Data Relay.

Randall Holley
PointClickCare Customer

PointClickCare Data Relay enhances senior care providers' flexibility to perform corporate-wide operational analysis and reporting, increasing business unit agility and responsiveness.

Many senior care providers have invested heavily in analytics and reporting capabilities in order to enact organizational improvement programs. Data Relay enables providers to combine key PointClickCare EHR data with other organizational data to broaden the scope

of their analysis, improve care levels and positively impact their bottom line. It improves reporting efficiency with automated, regularly scheduled data updates, eliminating time-consuming, manual report set-up steps.

Data Relay provides:

- Timely, automated access to subsets of PointClickCare EHR data
- Capability to combine EHR data with other organizational data sets
- Flexibility to create or customize reporting using the provider's own reporting systems

What is Data Relay?

Data Relay is a regularly scheduled data extract of key EHR data from the provider's PointClickCare EHR database. The extracted data can be used by providers to go beyond the native reporting capabilities of PointClickCare to create provider-specific metrics or dashboards, and can be merged with other corporate or 3rd party data for a broader perspective on operations. Data Relay offers the flexibility needed to leverage EHR data to best serve the organization as a whole.

How does Data Relay work?

With Data Relay, providers automatically receives a regular feed of key EHR data from their PointClickCare database. Delivered on an hourly schedule and as sets of data views, providers can import the data into their own databases, reporting tools and 3rd party systems as they see fit. Available data sets currently include:

- Facility
- Bed, Room & Unit
- System Codes
- Patient
- MDS Assessments
- Insurance
- Contacts
- Payer
- Census
- Stay & Episode of Care
- Billing & Accounts Receivable
- Security/Users

How do providers benefit?

Improved Organizational Effectiveness – Combine with other 3rd party data to get an expanded view of provider's operations.

Enhanced Insights – Use as a basis for creating organization-specific metrics and dashboards, tailored to the provider's programs and business needs.

Increased Efficiency – Incorporate into existing corporate dashboards for quick, at-a-glance, organization-wide analysis.
