

PointClickCare Home & Community Based Services

PointClickCare’s Home & Community Based Care solution was designed with client care services in mind. The easy-to-use interface allows users to capture and distribute timely, accurate, and complete documentation with minimal training, helping to maximize operational efficiency while decreasing employee onboarding costs and improving staff satisfaction.

Users can easily access a single-source of shared information for each client in real-time, enabling better decision making while reducing data errors and manual or duplicate efforts.

Our solution integrates seamlessly with the PointClickCare cloud-based senior care platform, ensuring a common platform for single sign-on, managing security, delivery of services, documentation, and more. It also enables the sharing of client information across care settings and during the transition of care.

Our “Care at Home” mobile app allows nurses to complete all their documentation in the home – even without cellular coverage. This includes real-time drug-interaction alerts, OASIS analysis warnings, as well as suggested orders, goals, and interventions for the care plan. Collecting data in the home results in more accurate & timely documentation. This enables agencies to bill and receive reimbursement quickly, which helps ensure a consistent level of profitability.

Compliance is supported throughout our application; from Scheduling, to Clinical charting, to Billing.

Our Medicare Billing dashboard alerts agencies to any outstanding clinical or financial items that are needed prior to submitting the request for anticipated payment (RAP) as well as the final claim, saving countless hours, potential errors, and reducing time-to-payment.

While scheduling an appointment, our system keeps the agency in compliance by validating authorizations and orders, confirming appropriate disciplines, and ensuring employees have up-to-date licensures and requirements in place.

Benefits include:

- ✓ Full clinical functionality both in our web application and our mobile app.
- ✓ Eliminate late timecards and leverage GPS tracking to prevent fraud.
- ✓ Disconnected documentation workflows.
- ✓ Automated OASIS Assessments and OASIS scrubber.
- ✓ Billing for private, commercial and government payers (Medicare/Medicaid).
- ✓ Single solution for the entire Long Term Post-Acute Care continuum.
- ✓ The support of a trusted Long Term and Post-Acute Care partner with a proven record in customer support.
