

A healthcare professional, likely a nurse or doctor, is shown from the chest up. She is wearing pink scrubs and has a stethoscope around her neck. She is smiling and looking down at a silver smartphone she is holding in her hands. The background is a blurred hospital room with a bed and some medical equipment.

PointClickCare®

Be the First Choice for Home Care

With the right technology platform, you will gain the insights needed to better manage the needs of your clients, maintain compliance, empower your staff, and improve your financial health.

90%

of older adults would prefer to age in place rather than move to senior housing.¹

The demand for home care services is increasing, with the global market value expected to reach \$391 billion by 2021. Rather than move to an assisted living community, seniors are remaining in their primary residences, preferring to live as long as possible in the place they're most comfortable — their home.

5%

compound annual growth expected for home and community-based services between 2014-2024.²

The home care industry is one of the largest growing trades nationally and internationally, but it's also one of the most difficult. Between tremendous growth, finding qualified staff, changing regulations, and managing the health and safety of clients, standing apart in this competitive marketplace can be a challenge. However, advances in technology have enabled providers to optimize their operational and care delivery efforts.

The Insights You Want. The Platform You Need.

PointClickCare’s cloud-based Care At Home solution has been designed to meet the needs and requirements of home care providers — both today and into the future. Our Remote Monitoring solution captures and tracks client progress between visits. Gain the highest level of visibility into insights that enable better decision-making, drive a higher quality of care, and ensure that you are paid for services delivered.

By providing your staff with the right tools, you empower them to be more effective and efficient — which will result in a higher rate of retention. Giving them the ability to connect remotely to a centralized platform enables better tracking, improved communications, and quality care. Our solutions help providers remove documentation and billing inconsistencies, eliminate tasks that take time away from providing care, and simplify the process of recording vital information.

Our integrated approach to connecting care services, billing, and administrative processes enables greater collaboration with providers across the care continuum. Using technology to track and manage client information will be essential as payment reform drives the continued rise of value-based care. As agencies build their referral partnerships across the continuum of care, having the right platform will help position your business for long-term success in a data and quality-driven environment.

PointClickCare enables an integrated approach to connecting care services, client monitoring, billing, and administrative processes.

PointClickCare Home Care

Insight Into Your Business

An integrated home care solution that delivers the insights you need to manage your business.

Improve Quality Care & Clinical Outcomes

- Create Individualized care plans & document at the point of care
- Reduce adverse health events with early identification of warning signs
