PointClickCare General System Technical Specifications

October 26, 2023
This document explains system specifications recommended when opening PointClickCare in a SaaS configuration. Some specifications depend on the development choices PointClickCare makes and cannot be changed. Some specifications are variable and depend on how your organization intends to use the modules.

What’s New

Internet Explorer (IE) 11 Deprecation
Effective February 14, 2023, Microsoft discontinued the use of IE 11. Microsoft directs users to Microsoft Edge.

To maintain the highest security standards and promote the safety of your Healthcare Information System (HiS), PointClickCare does not support IE 11 and MeadCo ScriptX effective June 15, 2022. It is highly recommended to upgrade to a supported browser as soon as possible.

For more information, see Supported Operating System and Browser Combinations [5].

MeadCo ScriptX Deprecation
MeadCo ScriptX is an IE 11 add-on used to format PointClickCare reports when printing from any device. With the deprecation of IE 11, MeadCo ScriptX is no longer supported.

How does this affect me?
If you use MeadCo ScriptX to print reports, reformatting can occur when you transition from IE 11. Possible format changes:

- Page orientation between landscape and portrait
- Page breaks
- Margins
- Headers and footers

How can I prepare?
If you print reports using MeadCo ScriptX, it is recommended to test by printing the reports in the supported browser [5] your organization plans to use. If you have concerns with report output, please submit a case to Customer Support.

Security

When configuring hardware and software to support PointClickCare applications, it is recommended to implement vendor supported operating systems and browsers. Using a vendor supported operating system and browser is the best way to protect your organization from online threats. Outdated systems often stop providing upgrades needed to keep them secure. Browser requirements for PointClickCare products are aligned with the Microsoft Lifecycle support policy for Internet Explorer. For more information, see Microsoft Lifecycle Policy.

Basic System Requirements

PointClickCare requires the minimum system specifications provided in this section.

Desktops and Laptops

- Processor – 2 GHz processor or faster
• RAM – 2+ Gb for 32-bit Windows® / 4+ Gb for 64-bit Windows®
• Video – Support 1024x768 screen resolution or higher

For a Microsoft Windows environment, the recommended operating system and browser configuration is Windows 10 with Internet Explorer 11. For more information, see Supported Operating System and Browser Combinations for Desktops and Laptops [5].

Tables and Phones

• Processor – 1.2 GHz processor or faster
• RAM – 1+ Gb
• Video – Supports 1024x600 or more for tablets, 480x800 or more for phones

Recommended operating systems for tablets are iOS 12.0+ and Android 10.0+. For more information, see Supported Operating System and Browser Combinations for Mobile Devices and Tablets [6].

Detailed Specifications

PointClickCare is designed to work across multiple browsers provided you configure the recommended settings on supported platforms.

Supported Devices for PointClickCare Main Applications

It is recommended to run PointClickCare applications through their native apps. For example, if you use iOS, use the POC iOS app instead of running the application through the browser. Running native PointClickCare apps with the device and operating system combinations shown below ensures you have the best experience.

</tbody>
</table>

### NOTE
It is recommended to use a Windows 10 configuration.

Effective February 14, 2023, Microsoft directs users to Microsoft Edge. **Microsoft discontinued the use of IE 11.** To maintain the highest security standards and promote the safety of your HIS, PointClickCare does not support IE 11 and the MeadCo ScriptX [3] add-on effective **June 15, 2022.** It is highly recommended to upgrade to a supported browser as soon as possible. For more information, see Microsoft Lifecycle Policy.

Document Manager supports the latest and previous 2 browser versions.
Supported Operating System and Browser Combinations for Mobile Devices and Tablets

The operating system and browser running on a mobile device and tablet also affect the operation of PointClickCare. It is recommended to use native mobile apps when available for iOS and Android.

- Available products are standalone apps.
- Embedded apps are accessed in the PointClickCare application in the browser.
- ~ Provides a non-ideal experience with the operating system on mobile devices and tablets.

NOTE

PointClickCare blocks screen captures on Android devices. IOS devices cannot be
blocked.

You can use Document Manager e-Signature (e-Sign) on a touch screen tablet to capture
the signature. You can open the application through a mobile device, however, it provides
a non-ideal experience. PointClickCare is working on enhancing mobile e-sign.

The eSign workflow in Document Manager does not support IE Mode in Microsoft Edge.
If you use IE Mode, ensure it is set to Don't allow. This includes devices owned by
others outside your organization.

To use eSign with Safari, you must enable browser cookies. If cookies is not enabled,
an error message appears. To enable cookies, clear the Prevent cross-site tracking
security setting.

eMAR is designed to function in a tablet environment through the Safari browser on the
iPad. While other features of PointClickCare may also be accessible on mobile devices,
they are currently not optimized for this type of experience. It is recommended to use the
native apps, when available, on mobile systems.

Old Physicians Orders and eMAR legacy screens were originally designed to run in
Internet Explorer and are deprecated. To benefit from future enhancements and cross
browser compatibility, it is recommended to follow the Orders Management upgrade plan.
For more information, contact your Customer Success Manager.

Unsupported Operating System and Browser Combinations

Some operating systems and browsers are unsupported by the vendor and PointClickCare. For
more information, see Microsoft Lifecycle Information.

While PointClickCare applications may run on these operating system (OS) and browser combina-
tions, they are a security risk for Patient Health Information (PHI). It is strongly recommended to
use a supported browser to access PointClickCare. PointClickCare reserves the right to identify
unsupported OS and browser combinations and take appropriate actions to enhance the security of
PointClickCare applications.

Operating Systems

PointClickCare does not support:

- Windows XP for any browser.
- Windows Vista for any browser.
- Windows 7 for IE 8, 9, and 10.
- Windows 8.0 for any browser.

NOTE

PointClickCare supports Windows 8.1.

Browsers

PointClickCare does not support Internet Explorer (IE) 8, 9,10, and 11, including the MeadCo
ScriptX add-on.
Mobile Strategy

It is strongly recommended your organization develops or reviews your mobile strategy to meet the goals of your organization. Your PointClickCare Customer Success Manager can provide input.

Mobile Device Management (MDM)

- Enforce Device and App Security. Protect devices from unauthorized access by enforcing lock screen passcodes and setting up device-level encryption.
- Manage app usage and updates centrally with remote ability to manage devices.
- Enforce PHI accessibility within building boundaries. Allow access to apps based on location using features such as geofencing capabilities.
- Facilitate device preparation and deployments using automated device enrollment.
- Monitor real-time visibility into the mobile environment of your organization by using reporting.

Additional Discussion Points

- Provide organization-owned devices to employees or employees use their own devices (BYOD) to run the apps.
- Brand corporately-owned devices with a corporate logo to clearly identify a corporate device is in use.
- Create a communication plan to inform residents and families that staff use mobile devices while providing care.

Browser Specific Configurations

PointClickCare validated and supports the browsers listed in Supported Operating System and browser combinations for mobile devices and tablets [6]. Our technical support team is available to assist you with application issues when working with supported browsers.

Apple® Safari Browser Configurations

PointClickCare makes every effort to test and support the most recent version and the previous major version.

</tr>
<tr>
<td></td>
<td>Options for disabling SSL protocols are not available. If you use Safari version 7 or later on iOS 13.4+ or macOS 10.15.4+, TLS 1.1, and TLS 1.2 are automatically turned off. To stay compliant, it is recommended to update your iOS or macOS to the most recent stable version.</td>
</tr>
</tbody>
</table>
Google Chrome Browser Configurations
Google Chrome applies updates automatically. PointClickCare makes every effort to test and support the most recent version and the previous major version.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| Turn off pop up blockers | 1. Open the browser menu. Press Alt+t, if needed.  
3. Click Site Settings.  
4. Click Pop-ups and redirects.  
5. Next to Allow, type: [*].pointclickcare.com  
6. Click Add.  
7. Close Settings. |
| Turn off TLS 1.0 and TLS 1.1, and turn on TLS 1.2, if applicable | 1. Open the browser menu. Press Alt+t, if needed.  
2. Select Show advanced settings.  
3. In the Network section, click Change proxy settings.  
4. Select Advanced.  
5. In the Security category, clear Use TLS 1.0 and Use TLS 1.1, and select Use TLS 1.2.  
6. Click OK.  
7. Close the browser and restart Chrome. |

Microsoft Edge Chromium-Based Browser Configurations

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| Turn off blocking third-party cookies | 1. Open the browser menu and select Settings.  
2. Select Site permissions and select Cookies and site data.  
3. Turn on Allow Sites to save and read cookie data (recommended).  
4. Turn off Block third-party cookies. |
| Turn off pop up blockers for PointClickCare | 1. Open the browser menu and select Settings.  
2. Select Site permissions.  
3. Expand Pop-ups and redirects.  
4. Turn on Block (recommended).  
5. In the Allow section, click Add and type: [*].pointclickcare.com |
| Turn off TLS 1.0 and TLS 1.1, and turn on TLS 1.2, if applicable | TLS version 1.2 or later is required. Microsoft Edge version 84 or later defaults to a minimum version of TLS 1.2. If you use Microsoft Edge version 83 or earlier, to maintain the highest security standards and promote the safety of your HIS, upgrade to the most recent Microsoft Edge version. For more information, see blog.microsoft.com. |

Microsoft Edge HTML-Based Browser Configurations

<table>

</table>
| Turn off blocking third-party cookies | 1. Open the browser menu and select Settings.  
2. Select View Advanced Settings.  
3. Under Cookies, expand Don't block cookies.  
4. Select Don't block cookies.  
5. Click anywhere on the screen to exit settings. |
**Step** | **Action**
---|---
**Turn off pop up blockers**<br>1. Open the browser menu and select **Settings**.<br>2. Select **Site permissions**.<br>3. Expand **Pop-ups and redirects**.<br>4. In the Allow section, click **Add** and type: `<*>.pointclickcare.com`<br>5. Click **Add**.<br>6. Close Settings.
**Turn off TLS 1.0 and TLS 1.1, and turn on TLS 1.2, if applicable**<br>1. Open the browser.<br>2. Click **Alt-T** and select **Internet Options**.<br>3. Click **Advanced**.<br>4. In the Security section, clear **Use TLS 1.0 and Use TLS 1.1**, and select **Use TLS 1.2**.<br>5. Click **OK**.

---

### Mozilla Firefox Browser Configurations

PointClickCare tests and supports the most recent version and the previous version.

**Step** | **Action**
---|---
**Turn off pop up blockers**<br>1. Open the browser menu and select **Options**.<br>2. Click **Privacy & Security**.<br>3. In the Permissions section, next to Block pop-up windows, click **Exceptions**....<br>4. In **Address of website**, type `pointclickcare.com`.<br>5. Click **Allow**.<br>6. Click **Save Changes**.<br>7. Close **Options**.
**Turn off TLS 1.0 and TLS 1.1, and turn on TLS 1.2, if applicable**<br>1. Open the browser.<br>2. In the address bar, type `config` and press **enter**.<br>3. Search for `tls`. <br>4. Double click `security.tls.version.min`. <br>5. Set the integer value to `3` to force protocol of TLS 1.2 only.<br>6. Click **OK**.<br>7. Close the browser and restart Firefox.

---

### Browser Add-ons

Some third-party Web browser plug-ins and extensions can interfere with the performance of PointClickCare. It is recommended to uninstall unnecessary plug-ins. If malfunctions or inconsistent behavior occur, disable all Web browser plug-ins and extensions, then try again.

### Adobe PDF Reader

To see PDF output format for reports, you must install Adobe PDF Reader 10.1.4 or later. This applies to all supported browsers. You can select the appropriate version of Adobe Reader for your computer from [get Adobe](https://get.adobe.com/reader/).

---

### Other Considerations

**Environments Containing Proxies and Firewalls**
To access PointClickCare on the Azure cloud, you must:

- Allowlist the following URL on your proxy or firewall: *.pointclickcare.com
  This ensures proxies and firewalls allow the port 443 from internal clients to external websites.
- Turn on Port 22 SFTP for file transfers.
  - US FTP server name: ftpus.pointclickcare.com
  - CDN FTP server name: ftpcdn.pointclickcare.com

**PointClickCare Public IP Addresses**

</tbody>
</table>

**Virtual Terminal Services**

Virtual terminal services, including Citrix, Virtual Machine, and Windows Remote Desktop Services, are untested. However, several PointClickCare customers use this architecture.
Internet Bandwidth Requirements and Port Settings

PointClickCare per user:
- Upload – 8 Megabit/second (1 Megabyte/second)
- Download – 8 Megabit/second (1 Megabyte/second)
- Packet loss rate – Less than 1%
- Port – HTTPS – 443

PointClickCare with eMAR per user:
- Upload – 12 Megabit/second (1.5 Megabyte/second)
- Download – 12 Megabit/second (1.5 Megabyte/second)
- Packet loss rate – Less than 1%
- Port – HTTPS – 443

Application Specific Configurations

All PointClickCare Applications
To provide the best experience with all PointClickCare applications, add the following domains to the allowlist in your firewall for HTTPS(443):
- *.pointclickcare.com
- *.pendo.io

Secure Conversations
To provide the best experience with the application, add the following domains to the allowlist in your firewall for WSS (443) and HTTPS (443):
- *.pointclickcare.com
- wss://tsock.us1.twilio.com
- https://media.us1.twilio.com
- https://mcs.us1.twilio.com

Unfortunately, at this moment it is not possible to use static IP addresses. This is due to the nature of the load balancing setup. In case an allowlist is required, it is still possible to enable a larger range of Amazon Web Service IP addresses.

Skin & Wound
To provide the best experience with the application, add the following domains to the allowlist in your firewall for HTTPS (443):
- *.pointclickcare.com
- *.swiftmedical.io
- *.pusherapp.com
- *.amazonaws.com
- *.fontawesome.com

Document Manager with e-Signature
To provide the best experience with the application, add the following domains to the allowlist in your firewall for HTTPS (443):
PointClickCare Technologies Inc. is advancing senior care by enabling long-term and post-acute care (LTPAC) with a portfolio of cloud-based software and services designed from the ground up to help providers manage the complex requirements of senior care. With a suite of fully-integrated applications powered by an interoperable, mobile friendly, and regulatory-compliant electronic health record and revenue cycle management platform, PointClickCare helps our customers connect and collaborate within their care network, achieve and demonstrate higher quality outcomes, optimize financial performance, and simplify their regulatory burden. Over 15,000 skilled nursing facilities, senior living communities and home health agencies use PointClickCare today, making it the North American healthcare IT market leader for the LTPAC industry. For more information on software solutions PointClickCare offers, please visit www.pointclickcare.com.
