

Checklist | What to Look for in Integrated Care Coordination Solutions

There are many solutions that provide integrated care and care coordination capabilities in bits and pieces. Integrated Care Coordination solutions meet the following criteria to enable care teams to gather, interpret and act on insight about patients and providers across the post-acute care continuum.

Criteria	What to look for	Rating
Seamless care transitions	Clinical data and patient info flows with the patient to enable seamless patient onboarding at care facilities	<div>High</div> <div>Medium</div> <div>Low</div>
Clinical workflows	Orders pushed directly into existing SNF clinical workflows to allow for delivery of care to be initiated without delay	<div>High</div> <div>Medium</div> <div>Low</div>
Chart level patient management	Provides visibility into key clinical indicators, at a patient level, that shows how a patient is doing in a given moment	<div>High</div> <div>Medium</div> <div>Low</div>
Track patient progress	Provides line of sight into patients' progress on the patient pathway at all times during the incident	<div>High</div> <div>Medium</div> <div>Low</div>
Take action during the incident	Uses evidence based risk scores and alerts when conditions have changed to proactively initiate interventions	<div>High</div> <div>Medium</div> <div>Low</div>
Scale case management ratios	Offers patient population and facility analysis to help manage caseloads, identify highest risk patients to focus on and scale the delivery of care	<div>High</div> <div>Medium</div> <div>Low</div>
Optimize facility selection	Offers recommendations on which facilities are best suited to specific patients based on past care outcomes	<div>High</div> <div>Medium</div> <div>Low</div>
Manage network performance	Enables timely, data-driven performance management conversations between hospital systems and SNFs	<div>High</div> <div>Medium</div> <div>Low</div>
EHR interoperability	Incorporates workflows from EHR to EHR to position the right care team member in the right place at the right time	<div>High</div> <div>Medium</div> <div>Low</div>
Supports clinical standards	Uses evidence based standard content to drive true care coordination	<div>High</div> <div>Medium</div> <div>Low</div>
