Better care requires a standard approach with the ability

Personalized Quality Care Across All Residents

Each resident is unique with their own set of diagnoses and conditions that require a specific set of actions to deliver optimal care. With Nursing Advantage, ensure that your caregivers deliver consistent care tailored to each of your residents. Assessments specific to skilled and long-term residents increase assessment quality and incorporate evidence based clinical suggestions, minimizing readmission risk potential.

Smart Assessments to Improve Efficiency and Workflow

Keep focus and attention where it counts most, caring for your residents. With process-optimized Smart Assessments tied to care plans, you can increase efficiency and focus staff on care delivery. When your caregivers and care managers can rely on the system of collection, then both can have confidence in the outcomes delivered.

Shift Focus From Creating Custom Assessments

Eliminate wasted time spent on outdated or customized assessments and all of the effort required to keep them updated. With Nursing Advantage, your organization can leverage standardized care focused assessments and reinvest the time saved into resident care. Your team can also benefit from the connected workflows and ties between diagnoses, assessments, care plans, and MDS.
