

Nutrition Management

Improve meal satisfaction, health outcomes and operational efficiency

Nutrition Management equips staff with tools & information to deliver exceptional meal service.

With the quality of food service being one of the most important decision-making factors for families choosing a senior care facility, implementing a nutrition management solution is a differentiator. It's a win/win for both the organization and the resident.

Nutrition Management Core includes Essentials, Menus, Recipes & Production and Nutrient Analysis for facilities looking to improve resident satisfaction and meal service quality while reducing operational costs.

Essentials

- Resident ADT, Photos, Food Allergies and Diet Orders can flow from PointClickCare EHR into Nutrition Management Essentials increasing accuracy & saving time
- Resident Dashboard for viewing key integration updates
- Many reports including tray cards & snack labels
- Organizations that wish to start with the basics can opt to subscribe only to Essentials

Menus

- Robust Menu Builder tool for managing cycle menu sets and special occasions
- Control which facilities/users have menu editing permissions
- Mobile Meal Ordering with "Show Plate" photos for placing orders at point-of service or in advance
- Starter Menus available for you to copy & modify

Recipes & Production

- Use preloaded recipes or add your own favorites
- Include recipe photos and create recipe books based on your menu & census
- Tally menu items from meal orders placed in advance and forecast based on history
- Auto resize recipes to match tallies and minimize leftovers

Nutrient Analysis

- Analyze planned menus against desired diet specific nutrient parameters
- View nutrient info when placing meal orders
- Activate warnings if meal is not within resident's diet nutrient guidelines
- Print intake analysis report for residents at nutritional risk based on what they ate

How do providers benefit?

Benefits of PointClickCare Nutrition Management

Improved Efficiency

Whether it's the time savings from automating the labels for resident snacks, auto resizing of recipes, or the reduction of time spent on printing, collecting and manually tallying selective menus, efficiencies can be gained in all areas of Nutrition Management.

Enhanced Quality and Compliance

With photo, food allergy and diet order integration, along with the Resident Dashboard, facilities can more efficiently ensure compliance with meal service requirements.

Increased Resident Satisfaction

Ensure resident preferences are accounted for with the capture of special requests, food dislikes and mobile meal ordering.

Improved Care

Improve health outcomes by tailoring meal service to consider each resident's needs so they are more likely to eat meals served and avoid malnutrition & dehydration.

Reduce Costs

Reduce food waste by producing quantities based on "smart forecasting" and automated recipe sizing. Easily adjust menus in response to seasonal food availability and fluctuating food costs.

Nutrition Management is available for Senior Living and Skilled Nursing facilities and does not require the PointClickCare Core Platform.
