

Resident Event Calendar

Simplify scheduling, managing and sharing resident activities.

Empowering care providers to easily create and manage event calendars; helping senior care providers efficiently meet the psychosocial well-being needs of residents.

Providers are holistically involved in the lives of the residents in their community, looking after both the healthcare and social needs of residents. Beyond the physician-driven care plans, care teams also need to help residents manage their other activities to help ensure both their physical health and psychosocial well-being.

By focusing attention on resident well-being, resident satisfaction will rise, which can

ultimately help providers to improve their overall occupancy rates.

With competition for residents at an all-time high and resident satisfaction so crucial to maximizing occupancy and profitability, providers need intuitive tools that can help them integrate care delivery events with non-care events to provide the best possible experience for residents, their families and staff.

Centrally track all community and resident events.

PointClickCare Resident Event Calendar is a robust, integrated scheduling application that delivers both resident- and community-event planning capabilities. It is designed to help providers not only create, view and print event calendars, but to align planned activities with required community resources - including vehicles, rooms, audiovisual resources - that are necessary to ensure the events can be well executed. With Resident Event Calendar, care providers can improve staff efficiency and event execution, which results in a better resident experience.

The types of events that can be tracked include:

- Physician and therapist appointments
- Visits from friends and family
- Barber and beauty appointments
- Social or physical activities
- Visits to other communities or off-site locations

Improve communications with staff, residents and family members

Resident Event Calendar is an integral part of the PointClickCare platform. Resident attendance and participation is tracked in community events, with the option to generate a progress note. This integration saves time by eliminating paper-based calendar tracking and by automatically keeping all care team members informed of residents' activities at all times. Resident Event Calendar enables users to print resident calendars for easy sharing with the residents, staff or even family members. With this accessible online tool, Activities Directors and Event Planners have the visibility and the tools they need to efficiently manage resident participation and ensure overall resident satisfaction.

With Resident Event Calendar, care providers are able to:

- Assess and improve resident engagement
- Ensure participation compliance with attendance tracking
- Leverage an integrated solution that improves staff efficiency
- Enhance person-centered care
