Solution Sheet

Performance Insights

Better Intelligence. Better Performance.

EHR driven clinical, financial, and operational metrics that enhance patient care, improve quality, and drive reimbursement. Give your team near real-time intelligence to continuously adapt and improve with comprehensive analytics that clearly tell you how your organization is performing.

Build a complete picture of your organizational performance.

Have operational awareness across your organization with data visualizations and reporting that can identify areas to improve. Understand how changes can impact your business and investigate the details behind metrics through drilldown capabilities.

From insight to action

Make better decisions with consistent, clear reporting across all operational departments and have confidence in your decisions with accurate, consistent data. Quickly see how you are performing at the organization, facility and resident levels from one central location.

Visualize emerging trends and identify where resources are needed

Understand how your organization is performing and address areas that can be improved to increase performance and care outcomes.

New Reports

With enhancements made to existing reports, Performance Insights has seven new reports to help with your operational reporting and monitoring.

Day Start

View the current census, payer mix, 30-day readmission and ED visit rate, as well as readmission or ED visits within a new resident's first 7 days.

PD3 Cross-check

Improve reimbursement by having your interdisciplinary team access all PDPM residents from one location. Identify which supporting documentation is complete or still outstanding to truly reflect the care provided.

Census

Easily identify admission and admission increases/decreases by hospital and payer.

Preadmission Estimator

Screen for financial and care implications of accepting patients under the new PDPM payment model.

ED Visits

Visibility into patients that visited the ED but did not readmit.

Survey Tag Analyzer

Know which deficiencies surveyors in your areas are citing most before they arrive. Filter to the most recent data, drill down to your specific county, and easily toggle between the various scopes and severities for tags.

Length of Stay

Review length of stay at corporate or facility level, by payer, by admitting hospitals.
