

## Solution Spotlight

## Care Insights

**Care Insights** offers care oversight managers analytics that make it faster and easier to understand how their organization is performing. A central location for the enterprise, facility, or resident level metrics, Performance Insights enables you to leverage these insights to make informed decisions and optimize your resident and financial outcomes.

**PointClickCare®**

### Improved Quality of Care

Enhance resident wellness by tending to those who need it most. By identifying your highest acuity population and which residents are triggering negative outcomes, your staff can prioritize care to those who need immediate attention and avoid costly hospital readmissions.

### Visibility to Staff Performance

Leverage reports to view how well staff is performing and to assist in making operational decisions regarding staff assignment, identification of continuing education needs or adjustments to staffing models. Subscribe to daily reports that can be emailed each morning to monitor documentation compliance for your Medicare population.

## Performance Insights enables you to:

Remove the burden of manually compiling resident data from multiple sources

Compile easy to read reports based on standard data

Empower your care leaders to give guidance to their staff

Identify and correct gaps in documentation

Monitor staff performance
