

Solution Spotlight

Nursing Advantage

PointClickCare's Nursing Advantage offers a clinical content solution designed to help your organization improve outcomes by leveraging best practices content. The most critical part of improving outcomes is efficient and consistent resident care supplemented by impactful clinical insights.

Nursing Advantage allows providers to achieve high quality outcomes while also providing efficient, personalized care to residents. Caregivers and care managers have confidence in the data collected and using this information, help improve the quality of care provided at your organization.

Deliver personalized, quality care across all residents

As a Director of Nursing, you need to ensure caregivers provide the best possible care to residents. Each resident is unique with their own set of diagnoses and conditions that require a specific set of actions to deliver optimal care. Give your care team a nursing process-based framework built on industry best-practices.

Nursing Advantage is a system of intelligence that enables your caregivers to tailor care plans for each resident. The solution includes 58 disease-specific care guides auto-triggered by ICD-10 CM codes, comprehensive clinical evaluations, and Smart Assessments tied to Care Plans. The evidence-based templates included in Nursing Advantage ensure your caregivers can deliver consistent care while still addressing a resident's unique needs.

Focus on people instead of paperwork

Keep focus and attention where it counts most, caring for your residents. With process-optimized Smart Assessments, you can increase efficiency and eliminate wasted time spent on outdated or customized assessments. Focus staff on care delivery, maximizing both efficiency and resident satisfaction for improved census.

Your organization can streamline the information your caregivers collect. When your caregivers and care managers can rely on the system of collection and gain actionable insights from the data, then both can have confidence in the outcomes delivered.

Improve financial results

Avoid penalties associated with unnecessary hospital readmissions, establish a positive reputation as a preferred referral partner, and benefit from the connected workflows and ties between diagnosis, assessments, care plans, and MDS.

Assessments specific to skilled and long-term residents increase assessment quality and incorporate evidence based clinical suggestions, minimizing readmission risk potential. Reduce the time staff spends building care plans by using existing, evidence-based content.

Nursing Advantage helps your organization:

 Complete consistent resident-specific assessments

 Generate evidence-based care plans

 Identify the sickest and highest risk patients to help prevent unnecessary hospitalizations

 Track care progress and identify trends

 Track, communicate, and improve care team performance
