

PointClickCare®

Solution Sheet

Hospital Associations

Our solutions support accurate patient matching, targeted analytics, streamlined access to data, and high-quality care collaboration.

PointClickCare helps hospital associations serve their members with timely and essential data-sharing networks, as well as solutions focused on improving care coordination and patient outcomes.

Providers and hospital systems are under pressure. Staff shortages, burnout, workplace violence, and increasingly limited resources plague the healthcare system—preventing the ability to provide the right level of care for patients who need it most.

Our hospital association solutions are rooted in deep, long-lasting partnerships that build complete, high quality data sharing networks aligning with the association's mission to serve its member organizations and their respective communities.

PointClickCare's solutions help hospital associations through:

- Improved best-in-class care collaboration solutions for member organizations
- Support for community network / statewide quality care priorities
- Strategic advisory and education on healthcare policy and regulations

Real-time, high-quality, statewide data-sharing networks

We bring vast experience across state and federal policy areas and the hospital association community to ensure our solutions reduce administrative burden, improve network integrity for hospitals and health systems, and optimize community health outcomes.

“Investment in technology is an important way of improving coordination of patient care. Our members put the needs of their patients and communities first, which is why we've chosen to partner with PointClickCare to help connect clinicians with the real-time insights needed to provide the best quality of care.”

Valerie Fleishman

Senior Vice President and Chief Innovation Officer at the Massachusetts Health & Hospital Association

With Pointclickcare You Can Expect:

Strengthened care coordination to improve quality outcomes

Enhanced coordination with state agencies and stronger urban/rural provider collaboration helps member organizations to improve health outcomes and care transitions while reducing emergency department utilization, readmissions, and adverse safety events.

Reduced administrative burden

We work with associations to help members benefit from automation of health plan and state agency reporting requirements (e.g., notice of admission, public health monitoring) and regulatory compliance. We also provide dashboards that reveal statewide trends using claims or state data.

Improved health system and ACO network integrity

Our platform tools, analytics, and reporting help members reduce patient leakage across communities, integrated care settings, and specialties. Plus, health systems can seamlessly connect with risk contract partners, easing transitions of care for closely managed populations.

Deep insights on key healthcare policy issues

PointClickCare brings expansive experience across state and federal policy areas — helping hospital associations improve state or intergovernmental agency collaboration. Additionally, we can build, stabilize, or modernize/optimize hospital association data programs to expand services to members and establish non-dues-based revenue diversification.

PointClickCare is a leading health tech company with one simple mission:
to help every provider deliver exceptional care.
