

Medicare Certifications

Timely and trackable certifications without the manual burden.

PointClickCare's Medicare Certifications provides a centralized solution to manage, complete, and track Medicare certifications with confidence, ensuring accuracy and compliance.

An integrated way to simplify compliance and reduce administrative strain.

Skilled nursing facilities (SNFs) are facing mounting pressures to meet strict regulatory requirements. At the same time, they must keep pace with evolving care needs and manage ongoing staffing challenges. Medicare certifications, a critical component of reimbursement and compliance, can be time-consuming and prone to delays when handled through manual or fragmented processes.

Medicare Certifications addresses these challenges by embedding the process directly into the PointClickCare EHR for SNF. The integrated workflow connects staff and providers in real time, guiding completion, reducing administrative back-and-forth, and keeping certifications moving without delays. With SMS notifications, progress tracking, and audit-ready documentation, teams can focus less on paperwork and more on delivering care.

The Value of Medicare Certifications

Streamline the Certification Process

Simplify certification management with a user-friendly electronic interface that provides clear guidance, reduces errors, and ensures complete, accurate documentation.

Strengthen Provider Engagement

Improve physician participation through SMS-enabled notifications, removing unnecessary barriers and making it simple to review and sign certifications quickly.

Ensure Regulatory Compliance

Give teams the visibility and documentation they need to track certifications in real time and confidently defend against audits when the time comes.

Key Features

Medicare Certifications							
Search by resident, payer, or provider							
New Certification		Upcoming				Completed
