Solution Sheet

SNF Aware for Health Information Exchanges

Unlock real-time SNF encounter visibility for HIE participants. PointClickCare's HL7 SNF ADT feed provides seamless access to your state's leading post-acute dataset, fuelling the fastest path to comprehensive care coordination.

PointClickCare partners with Health Information Exchanges (HIEs) to enable seamless SNF admit, discharge, and transfer (ADT) data exchange to hospitals, payers and more within the HIE's network. With our integrated data feed, we provide highly valuable encounter data that fosters effective care coordination among healthcare entities, connecting the entire care continuum.

SNF Aware for HIEs offers a standardized HL7 feed of SNF ADT data from participating SNFs utilizing PointClickCare's Electronic Health Record (EHR). By tapping into the largest post-acute data set in their state, HIE participants have access to a complete, and up-to-date view of a patient's encounter history, leading to better informed treatment plans and improved patient outcomes.

How Can SNF Aware Help HIEs?

Enrich your regional health information ecosystem with unparalleled SNF encounter data.

Direct delivery and seamless integration of HL7 SNF ADT data.

Manage data ingestion and integration easily with a simplified data feed, reducing administrative overhead.

"Providing real-time admission, discharge, and transfer information helps close care coordination gaps among providers across the state. It also significantly increases the volume and diversity of data available to providers, care teams, and health systems."

Dr. Isabell Pacheco

Chief Administrative Officer at Michigan Health Information Network Shared Services (MiHIN)

Connecting Care Across the Continuum

How PointClickCare's SNF Network Helps HIEs:

Leverage your state's leading post-acute data set

Grow and maintain a strong, high-performing HIE network with access to the largest post-acute data set in your state. Powered by a real-time SNF encounter feed, HIEs can improve care coordination between hospitals, clinics, health plans, and ACOs, leading to better-informed treatment plans, seamless care continuity and faster patient follow ups after discharge.

Access an automated, accurate, and standardized SNF encounter feed

Through a direct source to PointClickCare's participating SNF network, HIEs can access an accurate, standardized HL7 feed – eliminating delays in obtaining critical patient information for their participants, resulting in improved outcomes and reduced provider burden across their network.

PointClickCare is a leading health tech company with one simple mission:
to help every provider deliver exceptional care.
