PointClickCare®

Your EHR is the record. **ED Optimization is the radar.**

ED Optimization complements your EHR by **pushing** only essential, standardized, cross-setting insights **into** your ED workflow **before** an encounter, so clinicians can make decisions faster with less searching.

Your EHR	ED Optimization
Stores a full patient record from within your health system with searchable charts, encounters and documents.	**Pushes a patient-centric summary** into your workflow: • Just what you need for rapid ED decisions: standardized, concise, seamless • Automated, instant notifications delivered within seconds of patient registration • Notifications are clear, consistent and easy to follow **No hunting. No guessing. No overload.**
Surfaces data primarily from inside your health system and limited connected settings within your EHR or network.	**Expands visibility** beyond your walls and EHR: • Draws from the largest nationwide care collaboration network • Over 30,000 care settings including ambulatory, behavioral, acute, and post-acute • From any EHR or health system **No matter where the patient has been seen.**
Supports clinical workflows as the **system of record.** Available to search, view and document.	**Seamlessly embeds** into your ED workflow: • Critical insights **arrive in the EHR,** not a separate portal **Fewer clicks, "refreshes", and searches.**
Displays a broad patient history that can slow ED triage.	**Delivers essential, actionable insights:** • Quickly identify high-risk patients of interest • View specific insights collected from the patient's broader care team, anywhere in the US • Obtain the **only SNF Stay Summary** for post-acute transfers, powered by AI-driven transfer insights, diagnoses, administered medications and more **Improving triage and throughput.**
Presents a broad spectrum of clinical data with a variety of tools and alerts that can overwhelm and fatigue users.	The right data in the right moment **has proven impacts:** • Torrance Memorial **cut avoidable ED utilization by ~50%** and reduced **100+ provider hours per week** searching charts • Sutter Health **reduced ED LOS by up to 40%** • Community Health Network saw a **33% drop in post-acute readmissions**
