

PointClickCare®

Billing Advisor

Skilled Nursing

AI-powered billing intelligence built into your EHR

Skilled nursing organizations provide reimbursable services every day that never appear on a submitted claim. High-cost medications, IV therapies, and ancillary services are documented but not captured, creating revenue leakage that happens without a denial.

1-6% revenue leakage due to missed billable carve outs.*

*Estimated figure based on market research

Billing Advisor scans clinical documentation and orders inside the PointClickCare EHR, surfacing reimbursable services and revenue risks with supporting evidence attached, so billers can validate and submit defensible claims before timely filing deadlines expire.

AI-Powered Billing Intelligence

Capture Reimbursable Services

Surfaces high-cost medications, IV therapies, and vaccines before claims are generated..

Prevent Authorization-Driven Denials

Identify level-of-care mismatches before submission, preventing a primary cause of denials.

Submit Defensible Claims

Submit claims backed by AI-screened, biller reviewed clinical evidence that holds up to payer audit.

BB

The true power of AI lies entirely in the data it ingests. With PointClickCare sitting on the industry's largest network, we can train our AI on a scale that point-solution startups simply cannot match. Solutions like Billing Advisor don't just ease the administrative burden, they actively secure a provider's financial health so staff can keep their focus where it matters most: on the resident.

Key Features

Automated Billing Intelligence

- Continuously scans clinical notes and orders inside the EHR to surface every reimbursable service before claims are generated.
 - Surfaces high-cost medications, IV therapies, and vaccines in a prioritized billing queue.
 - AI-screened clinical evidence attached to every opportunity for fast validation by billers.
-

Authorization Gap Flagging

- Identifies level-of-care mismatches in clinical documentation before claims are submitted.
 - Flags authorization gaps so billing teams can resolve them while the resident is still in care.
 - Helps prevent claim resubmissions and protects revenue from avoidable claim denials.
-

EHR-Native Workflow

- Works directly inside the PointClickCare EHR with no extra login or workflow disruption.
- Uses clinical documentation already in your EHR as the input; no migration, data exports, or duplicate data entry required.
- Connects clinical documentation directly to billing action inside the EHR your team already uses.

PointClickCare is a leading health tech company with one simple mission:
to help every provider **deliver exceptional care.**
