

Study Buddy by PointClickCare Life Sciences

Study Buddy revolutionizes the way researchers interact with long-term care data, making it accessible to users of all technical skills when powered with AI tools.

Researchers can answer questions for the pre-award stage of research and use the data to support grant submissions or papers. What previously used to take weeks now takes minutes.

Here's how Study Buddy will change your research:

Accelerate your research:

Cut weeks of manual work down to hours with intuitive cohort creation and instant data visualization

Reduce complexity:

No need to master LTC regulatory environments or sift through endless documentation - Study Buddy guides you through every step!

Publication-quality results:

Sample queries and definition libraries verified by our team ensure you get the right results - fast!

Flexible outputs:

Generate table shells and visuals that are ready for studies, posters and publications

Secure and private:

Work confidently with protected real-world data.

When powered with AI, researchers can:

- Rapidly test hypotheses against long-term care data in minutes (vs. weeks with analyst cycles)
- Identify signals worth pursuing before committing budget/time to full analyses
- Generate evidence to strengthen grant submissions and early manuscripts
- Explore subpopulations and prescribing patterns to refine research questions
- Iterate quickly: ask more questions, rule out dead ends faster, and focus on fundable ideas
